CLIENT STORY

University of St. Thomas
SUMMARY

Founded in 1885 on a commitment to bring a quality education to the Twin Cities area, the University of St. Thomas has done exactly what they set out to do. In the process, they’ve welcomed a record number of students into their classrooms, equipping them with the knowledge, experiences, and skills to make lasting contributions to the businesses, organizations, and communities they help shape.

To sustain this substantial growth in students, and the staff and faculty that serve them, the University of St. Thomas tasked SafetySkills with the challenge of deploying an online safety training program throughout campus operations.

**Diverse**
Training needs across all campus operations

**Complex**
Technical requirements for Learning Management System and course delivery

508 Compliance

2,500+ Learners
Overcoming Barriers

**CHALLENGE**
University of St. Thomas operations are diverse, from laboratories to physical plants to campus security, and they needed training courses that addressed the many hazards and environmental impacts associated with them. In addition, the school’s commitment to quality demanded that every course be highly effective and credible.

**SOLUTION**
SafetySkills provided the University of St. Thomas with a library of over 350 course titles that exceeded their requirements, including a full catalog of courses built specifically for colleges and universities.

Custom Solutions

**CHALLENGE**
As a large urban institution, the University of St. Thomas also needed a robust LMS with advanced configuration, tracking and reporting features, that was also easy to use and backed by a robust support system. It needed to be secure, run on multiple platforms and browsers, and integrate with the school’s existing IT platforms including user authentication, single sign on (SSO) and LDAP compatibility.

**SOLUTION**
SafetySkills user-friendly, enterprise-class LMS was able to meet and in many ways exceed every one of the university’s technical requirements. The robustly-supported, cloud-based platform was able to deliver, track and report on both self-paced and group training delivered on desktop, mobile, and even through offline sessions.

Our process

SafetySkills balances a deep knowledge of safety with the ability to produce high-quality, responsive instructional content. All of our products and services are developed 100% in-house, and are supported right here in our Oklahoma City studio by the people who made them. Our singular focus on training employees in life-critical competencies allows us to offer high quality content that connects with people.

We believe engagement changes everything. Because safety is imperative to growth, highly engaging and relevant content is crucial to the success of any company. With this in mind, our courses are designed to reinforce company brand messaging, with a high degree of interactivity and industry-specific content to produce the most effective results.
ABOUT SAFETYSKILLS
